

FASTPATH

CONFIG AD

Fastpath Config AD integrates Microsoft Dynamics GP with Active Directory for streamlined security management.

Config AD moves all user provisioning to the IT help desk and eliminates potential security conflicts by removing user administration from GP.

A Proven Solution

"Config AD has allowed us to separate user provisioning for GP Security Administration. This allows for full separation of duties of our GP security group and our IT security group as well as full logging of all actions done by either group for compliance reporting. The best thing about this arrangement is that my IT Security Group does not have any access directly to Dynamics GP other than through Config AD so this separation is absolute!"

Kenneth Pribble, Enterprise Architect, Affinity Gaming, LLC

Product Features

Streamline Security

- Microsoft Dynamics user provisioning requests become standard Help Desk task
- Manage Microsoft Dynamics CRM and GP user provisioning from one window
- Automatically logoff users after periods of inactivity

Separate Security from Dynamics

- Manage Microsoft Dynamics GP security via Active Directory groups
- Eliminates use of 'sa' and Administrator for better security management
- Active Directory user disables/deletes are automatically synchronized with Microsoft Dynamics

Single Sign On Capability

- Allows users to synchronize Windows IDs and passwords with GP
- Windows password policy enforced for Microsoft Dynamics GP logins
- Compatible with Citrix, Terminal Services, Remote Desktop Services and Virtual Machines

Efficient GP Environment

- Reduce GP License needs with the auto logout feature
- Fewer Orphaned users with synchronized deletion between AD and GP
- Remove nuisance calls to GP Admins for password resets and over utilized licenses
