# Standardize audit and risk management processes with Fastpath Assure

ABOUT FASTPATH ASSURE:

Fastpath has deep expertise in audit, security, and compliance technology. With more than 1,000 customers in 30-plus countries across multiple industries, our company supports risk management efforts and has global partnerships with several of the world's largest accounting firms.

See what customers are saying:

"This isn't my first ERP auditing tool, but Fastpath has been, by far, the best tool I have used. I'm impressed with Fastpath's performance and customer service."

– Helen Fleck, IT Audit Manager, FranklinCovey

WHAT WE OFFER

Organizations are increasingly embracing best-of-breed solutions on their digital transformation journeys to enable their business processes, highlighting the need for cross-application access review management. The Azure-based Fastpath Assure audit platform can track, review, approve, and mitigate access risks across multiple applications from a single dashboard.

Via Fastpath, your business can track database changes, automate access approvals, discover how security changes affect your Microsoft licenses, and quantify the financial risk of segregation of duties (SoD) conflicts. The suite comes with a preconfigured SoD rule set specific to the world's leading ERP solutions and many CRM/HCM systems.

In addition, Fastpath connectors leverage our advanced platform to enable rapid integration with custom applications.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
